

5.2 (b) (v)

Sonntag, 14. November 2021 17:01

$f, g, h \in L^1(\mathbb{Z})$:

$$(f * g) * h = \left(\sum_{\ell \in \mathbb{Z}} f(\ell) \cdot g(k - \ell) \right) * h(k)$$

$$= f(k) * \left(\sum_{\ell \in \mathbb{Z}} g(\ell) \cdot h(k - \ell) \right) = f * (g * h)$$
